Reflections
Memory Care

A Life of Dignity and Purpose

A mindful, non-pharmacological approach to promoting dignity and quality of life for those with memory challenges, through compassionate care and a focus on the person, not the disease.

Our Reflections Memory Care program is based on a philosophy of empathy, expression and mindfulness. Through varied and carefully planned programs, we support and enrich the experiences that our residents have every day. We encourage them to be active members of society, to be independent, to express themselves and to flourish. We create life experiences and events, not activities.

Reflections is distinguished by its five *Principles for Vitality*, which connect with the whole person through Continued Learning, Arts & Culture, Physical Fitness, Community Connections and Wellness & Self-Care. Through these five dimensions residents thrive in the moment as their best selves.

Influenced by an evidence-based wellness model, our memory care program is led by dementia professionals who are certified by the **National Institute for Dementia Education (NIDE)**.

Expressive Arts

...where words fail, expression remains

Expressive art therapies stimulate parts of the brain that hold memories, skills, desires, and feelings like comfort and joy. Because art transcends speech, we can achieve profound connections.
